Jess Hsu

Senior Product Designer

meg22152@gmail.com | +886 930-269-066 | Taipei, Taiwan | Portfolio: jesshsu.com

SUMMARY

8+ years of experience in product design, specializing in B2B SaaS, AI Security, Web3, and Design Systems. Skilled at transforming complex workflows into intuitive product experiences while balancing user needs, business goals, and technical feasibility. Experienced in 0-to-1 product development, cross-functional collaboration, and design system development, with a focus on creating products that deliver both business value and great user experiences.

EXPERIENCE

Senior Product Designer | **AIFT** Jul 2021 – Jun 2026

Worked across three product teams spanning AI Security, Web3, and Cybersecurity SaaS, contributing to product strategy and design across multiple product lines.

> **Senior Product Designer** | **Vulcan** Jan 2024 – Jun 2026
>
> - Led end-to-end product design for an **enterprise GenAI security platform**, transforming complex red-teaming, risk analysis, and compliance reporting into intuitive workflows that **supported 21 enterprise projects across 4 markets**.
> - Built and governed a cross-product Design System, standardizing components and handoff guidelines while **reducing design-to-development time by 20–30%**.
> - Partnered with Product, Engineering, and AI Security teams to **support a 30,000-case financial PoCan d bring the SaaS product to AWS Marketplace**.
>
> **Senior Product Designer** | **OneSavie Lab** Aug 2022 – Dec 2023
>
> - Led product design for Web3 DeFi and Blockchain Risk Monitoring products, defining core workflows, information architecture, and user experiences from 0 to 1. **Served 3,300+ users with US$876K in TVL**.
> - Conducted competitive analysis, user interviews, and rapid validation to continuously iterate on product features and improve usability.
> - Established brand visual identities and design languages to create consistent and distinctive product experiences.
>
> **Product Designer** | **Cymetrics** Jul 2021 – Jul 2022
>
> - Designed UI/UX for an enterprise cybersecurity SaaS platform, translating security testing and compliance workflows into intuitive user experiences.
> - Conducted in-depth interviews with enterprise clients to identify pain points in vulnerability management and compliance workflows, turning insights into actionable product design decisions.
> - Collaborated with cybersecurity experts to define product requirements and used Design Sprints to rapidly validate design directions.

UI/UX Designer | **CTWANT** May 2019 – Jun 2021

- Designed UI/UX for the company website, CMS admin platform, and mobile app, improving the overall cross-platform product experience.
- Coordinated cross-functional projects across product, engineering, and design teams to ensure successful delivery.
- Facilitated UX workshops and introduced a user-centered design process to the team.

UI/UX Designer | **TripMoment** Mar 2018 – May 2019

- Independently designed the company website and admin platform, established the brand identity, and mentored a Junior Designer.

Visual Designer | iCHEF Jul 2016 – Jul 2017

- Led the overall visual design for monthly marketing campaigns, planning and executing 12 brand campaigns in collaboration with Marketing and Product teams.
